Grow Your Business with POS Functionality that Never Quits

Don't let your POS system get in the way of serving guests and reaching your revenue goals.

The dependability and capability of your POS system is paramount to creating and maintaining guest confidence. A dependable and feature-rich POS system gives you an edge against the competition, keeps transactions flowing, and ensures a seamless integration with your current back-office technologies without a large investment.

Agilysys InfoGenesis® POS is designed to serve guests more effectively while improving your profitability. This flexible point-of-sale system is easy to set up and maintain, and its scalable architecture allows you to add workstations without having to build out expensive infrastructure. InfoGenesis POS integrates easily with a wide variety of other applications, including property management, inventory and procurement, self-service options, property activities and so much more.

Process transactions in your highest volume, most demanding business environments worldwide, with no loss of performance at the point of sale. InfoGenesis POS software provides industry-leading offline capabilities so you can deliver uninterrupted guest service even during intermittent network connectivity.

InfoGenesis® Flex offers state-of-the-art POS mobility with the same functionality as a stationary terminal on a variety of tablet options. Get your hands on the industry's most dependable, full-featured mobile experience for any POS or restaurant service staff. Use on a handy 8" tablet or leverage the 10" version as a sleek terminal that easily converts into a mobile solution for line busting or temporary portable scenarios. Because one size shouldn't fit all, select the tablet options that work best for you. No matter your choice, you get the full power of InfoGenesis POS in your waitstaff's hands so they can cover greater areas in less time, without ever losing touch with guests.
